## Sense of utility

### Eseki hook

Individual wall hanger made of curved plywood. Combining a simple sense of utility with a soft shape, a strip of plywood is steamed, stretched out and then reshaped. Hand-sanded and finished with high-performance satin lacquer. It features a recessed fixing bracket on the wall-facing side for optimal strength.

Eseki is characterized by its simplicity. However, its strong construction is built to sustain the needs of the consumer. This cozy and light piece of furniture suits perfectly in almost every interior, either into offices or living rooms.
